John Mac Donald Legal Advisor General Enforcement Branch, EPA Enforcement Division 26 Federal Plaza New York, MY 10278

August 3, 1982

Re: Norton & Son, Inc. Bayonne, NJ EPA ID No. NJD001367473

Dear Mr. Mac Donald:

As per your request, I am sending you this letter to confirm our telephone conversation today regarding the letter from EPA dated July 16, 1982 with respect to the December 17, 1981 inspection.

The following is a summary of our discussion regarding storage of hazardous waste at our facility:

- 1. In our letter to EPA Permits Administrator Branch of July 1, 1982, we requested a change in status of our facility from TSD to generator.
- 2. We have a above-ground capacity of 5,000 gallons for storage of wash solvent, which is shipped off-site periodically for reclaiming. This solvent waste and any other hazardous waste generated at this facility is no longer stored in excess of 90 days.
- 3. We are now in compliance with the following requirements applicable to generators of hazardous waste.
 - a. 262.30 Packaging
 - b. 262.31 Labeling
 - c. 262.34 Accumulation Time

..... Contd.

4. Dr. Victor B. Meyer has been assigned the responsibility for regulatory affairs. If you need further information or have any questions regarding the subject matter, please feel free to contact Dr. Meyer or the writer at (201) 437-0770.

Thank you very much for your assistance.

Please acknowledge receipt of this letter.
